GOST Apparition, the latest Security, Monitoring & Access Control System in a series of Award Winning Products. The system features optional high definition video surveillance and Inmarsat satellite-based Global GPS tracking for complete control from anywhere in the world.

TOTAL PROTECTION
COMPLETE PEACE OF MIND
GOST APPARITION
Security, Monitoring & Access Control for any size vessel

Touchscreen Based Wireless & Hardwired Marine Security, Monitoring, Access Control System with optional Surveillance & Satellite Tracking for Global Coverage. The GOST Apparition is the most customizable and powerful GOST Security & Monitoring System ever released. It is controlled via interactive touchscreen keypads or from your smartphone or tablet. With the ability to support up to 192 sensors, access control for up to 32 doors or hatches, and capacity to check the status of each one via the touch screens installed throughout the vessel.
The GOST Apparition system is controlled via interactive touchscreen keypads installed throughout the vessel. Available in the standard 5” version or a larger 7” model, the system can support up to 16 touch-screens throughout the vessel. If the system goes into alarm, the user can simply touch a flashing icon and see the exact location of the sensor in alarm. In a high-stress situation, this can be particularly helpful as it gives the user precise situational awareness & a real image of the area in alarm.

- Total control from any mobile device
A thick and disorienting fog wards off intruders and deposits a unique, location-specific DNA marker on skin, clothing and stolen items. Deploys & fills room within seconds
- Produces a zero visibility environment
- Harmless dry vapor with no negative side effects
The minutes between alarm activation and arrival of response teams is a crucial period, wherein thieves can still manage to rob you of thousands of dollars in property. Reclaim this critical time with installation of the GOST Acoustic Sound Barrier.

- Stops intruders in their tracks
- Generates an unbearable sound and frequency pattern
- Works with all GOST Systems or as a stand-alone unit
